

The Golden Age

Bush

Walk through the wasteland
Walk through the memories
The end of paradise
The end of you and me
Come the daylight
Come disharmony
Come confusion
Cycles of the function in dysfunctionality

I was born to do this
And I don't want to die
I want to live forever
Under a beautiful sky
All you got is the same as me
I got you and you got me

The golden age
The golden age
The golden age came undone
The golden age
The golden age
The golden age came undone

Fires at the roadside
Fires in the houses
The city has fallen
People run for their lives
And I can't surrender
And I can't forget
I'm the worst loser
Be careful what you said
All the pain is right there in your eyes
All those years of sacrifice

The golden age
The golden age
The golden age came undone
The golden age
The golden age
The golden age came undone

It's a wasteland
I'm not over you
It's a wasteland
I'm a make through
It's a wasteland
In the underground
It's a wasteland
On the edge of town
It's a wasteland
Inside my head
It's a wasteland
But we're still not dead

The golden age
The golden age
The golden age came undone

The golden age
The golden age
The golden age came undone
