

# Radio

Busted

Hold on, nothing's forever  
I know, things will get better  
Tired of the radio  
It never makes me feel the way it should

Drivin' down the boulevard  
It's a lonely road  
And now and then can hit me hard  
It's like I've seen a ghost  
There's a shadow over me  
It's with me all the way  
You're my only one, my everything  
I miss you every day

Hold on, nothing's forever  
I know, things will get better  
You used to love the radio  
You'd sing along, and make it sound so  
Good when we were together  
And I miss you more than ever  
Tired of the radio  
It never makes me feel the way it should

I don't wanna be the one  
On the hotel floor  
Waking up in twenty years  
Thinking what was it all for  
I know I got to let you go  
And you want me to be free  
But I can't move on without you now  
It's always you and me

Hold on, nothing's forever  
I know, things will get better  
You used to love the radio  
You'd sing along, and make it sound so  
Good when we were together  
And I miss you more than ever  
Tired of the radio  
It never makes me feel the way it should

Hold on, nothing's forever  
I know, things will get better  
You used to love the radio  
You'd sing along, and make it sound  
The way it...  
The way when we were together  
And I miss you more than ever  
Tired of the radio  
It never makes me feel...  
The way it should  
The way it should

You know you gotta hold on  
You know you gotta hold on  
Yeah yeah

You know you gotta hold on  
You know you gotta hold on  
You know you gotta hold on
