

Lonely are the ones who fall from love
Lonely are the ones who never know it
Lonely are the ones who look too up above
And lonely are the ones who never show it

What lights you up? What makes your blood run cold?
Until tomorrow you can drown away your sorrows
You can drink till the cows come home
But nobody likes drinking alone, keep moving on

What lights you up? What makes your blood run cold?
Until tomorrow you can drown away your sorrows
You can drink till the cows come home
But nobody like drinking, or thinking alone

Stars will shine and what is broke will mend
Find the voice in your heart and obey it
I will love you darlin till the very end
Sorry that it took so long to say it
Sorry that it took so long to say it

What lights you up? What makes your blood run cold?
Until tomorrow you can drown away your sorrows
You can drink till the cows come home
Something deep has been dogging your soul
Cause nobody likes drinking, or thinking alone
Keep moving on
