

The Convo (Interlude)

Cadet

Bro
I never completely understood what happened
I started to believe this was all God pattern
The last time we was together
You offered me a drink
I declined
Oh how I wish I could rewind
And now a lot of people are filled with regrets
But big bro
Are can't lie
You ignited a flame in a lot of people
And I know I'm telling you something you already know
Your show at Brixton O2 sold out, yo
I love you so much king
The day we buried you, I felt my heart sink
Just know that you were and I truly loved
You thought on Earth you were underrated 'cause you was
You know I ain't gonna mess you about
But you did something to the game when you was takin' out
You went from underrated one day, to a rated legend the next
It takes years for anybody to make that switch
But you done it fool
You done it
I miss you so much Blaine, I really really do
You're probably busy shaking up paradise
So I'll speak to you soon
PS: Roman and Chandler are all good
I took little man Portugal
And he showed me how fast he could swim, ha
That little yute there is truly your twin
From the head shape
To the color of your skin, it's mad
Cadz
I just wish you were here to witness everything that is happeni
ng
The seeds we planted, are growing rapidly
You would be proud
Never will your name be forgotten
As long as me and your real ones are around
Baline, I love you deeply
I will never let you down
Thank you for being my knight in shining armor
And showing me the true meaning
Of when a king, wears a crown
