

Above The Water

Cadmium

Wanna say that I'm sorry
For how things turned out
There were moments when the currents pulled us down
Never want you to worry
Cause I got you now
It's not easy
But believe me, I'm around

When the walls start caving
And you can't take it
Don't be afraid to hit the ground
Oh, your hands are shaking
But we're not breaking
I promise I won't let you drown

Keep your head above the water
I need you here to make me stronger
Even when it's getting harder
Keep your head above the water
Keep your head above the water
Hold on for a little longer
When the walls start caving
Oh please just
Keep your head above the water

Wish I could've prevented
The way things went down
There were moments we felt hopeless, filled with doubt
It's not the end of our story
Cause I got you now
It's not easy but believe we'll make it out

Pre
When the walls start caving
And you can't take it
Don't be afraid to hit the ground
Oh, your hands are shaking
But we're not breaking
I promise I won't let you drown

Keep your head above the water
I need you here to make me stronger
Even when it's getting harder
Keep your head above the water
Keep your head above the water
Hold on for a little longer
When the walls start caving
Oh please just
Keep your head above the water
