

## Low

## Cadmium

I can't forget all that you've done to me, nah  
Knew it would be the death of me cause I can't shake it off, no  
I wonder why you just let it go  
To me I don't seem that long ago  
And it gets all tangled up in my emotions

You took a step and then we're good to go  
A leap of faith but baby you should know  
I feel so alive, feel so alive, I erase the night

Yeah you had me for a lifetime  
Never knew my love was such a crime  
Now you got me feeling low  
What you need to know  
You were always my downtime  
My beginning and my lifeline  
Now you got me feeling low  
Yeah you got me feeling low

Now you got me feeling  
Now you got me feeling  
Now you got me feeling  
Now you got me feeling

Never knew that love could hurt like this  
Guess what we had was kinda hit-or-miss

What you need to know  
Yeah you got me feeling low

I spent all this time tryna figure it out  
Again and again  
Guess I'm friends with the devil for real

You took a step and then we're good to go  
A leap of faith but baby you should know  
I feel so alive, feel so alive, I erase the night

Yeah you had me for a lifetime  
Never knew my love was such a crime  
Now you got me feeling low  
What you need to know  
You were always my downtime  
My beginning and my lifeline  
Now you got me feeling low  
Yeah you got me feeling low

Now you got me feeling  
Now you got me feeling  
Now you got me feeling  
Now you got me feeling

Never knew that love could hurt like this  
Guess what we had became so devilish

I feel so alive, feel so alive  
Yeah you got me feeling low

I feel so alive, feel so alive  
Yeah you got me feeling low
