

# Fall Asleep Slow

Cafuné

You take mints for the pain  
To daily control games  
You go out, you already know  
You stand in the backgrounds and hold on to 4000 people you don't really know  
They tell you it's alright  
You're feeling your throat tighten up as you're packing to go  
To stay in the house where your doubts and devices go

I don't wanna stay on this call anymore (I don't wanna stay on this call anymore)  
Please help me escape this sedated cure

Can't we fall asleep slow?  
I'm not unsure in the morning if you'll go  
Let me in your dreams so I know  
Alarm clock is on, but time doesn't move that slow

Breathe in and slowly these people don't know the three words from the sevens before  
You've said things you don't know to get to these vaccines  
But nobody here's got a cure  
You see your reflection in all of the faces that turn as you walk down the road  
That leads to the house where your doubts and devices go

I don't wanna stay on this call anymore (I don't wanna stay on this call anymore)  
Please help me escape this sedated cure

Can't we fall asleep slow?  
I'm not unsure in the morning if you'll go  
Let me in your dreams so I know  
Alarm clock is on, but time doesn't move that slow

I don't wanna stay on this call anymore  
Please help me escape this sedated cure  
I don't wanna stay on this call anymore  
Please help me escape this sedated cure  
I don't wanna stay on this call anymore (I don't wanna stay on this, I don't wanna stay on this)  
Please help me escape this sedated cure (I don't wanna stay on this, I don't wanna stay on this)  
I don't wanna stay on this call anymore (I don't wanna stay on this call, don't wanna stay)  
Please help me escape this sedated cure (I don't wanna stay on this call)

Can't we fall asleep slow?  
I'm not unsure in the morning if you'll go  
Let me in your dreams so I know  
Alarm clock is on, but time doesn't move that slow

Help me, I don't wanna go home  
I'm surrounded by friends that make me feel alone  
Saying I don't really wanna go home
