

Shadowboxing

Cafuné

Don't tell me how to love myself
Don't show me your books on self-help
You try to make me a maniac
But you know where the exit's at

This time is the last time
In this temporary moment
When it passes, I'll acknowledge
All the people I pretend to know and
How could this have happened
It's been leading us to clashing over
How my fits of passion fucked us up

There's no future with you
Shadowboxing with you
Nothing more I can do
(Forever, can't stay forever
Can't stay together, can't stay forever with you)
There's no future with you
(Forever, can't stay forever
Can't stay together, can't stay forever with you)

Don't tell me how to throw a punch
I'll laugh about it when we're done
This ends the conversation
Holding on too long

How could this have happened?
It's been leading us to clashing over
How my fits of passion fucked us up

There's no future with you
Shadowboxing with you
Nothing more I can do
(Forever, can't stay forever
Can't stay together, can't stay forever with you)
There's no future with you
(Forever, can't stay forever
Can't stay together, can't stay forever with you)

Can't stay together, can't stay forever with you
Can't stay together, can't stay forever with you
