

## Sore Spot

Cafuné

Said an afterthought  
Never knew it'd have much meaning  
Now I've played a part  
In giving you that broken feeling  
Think we lost the plot  
Shine a light on what's worth healing  
Now I've played a part  
In hurting you with how I'm feeling

Better I forgot  
Injuries spent so long mending  
Hit a real sore spot  
Cutting you with questions pending  
Bitter tastes a lot  
Like strong emotions growing stale  
I hit a real sore spot  
Telling you before I forgot

I've changed  
I see you've stayed the same  
But you should know that I'm not placing blame  
You'll change  
Your anger burns out heavy  
And I know it's hard to tame

I've changed (I've changed)  
I see you've stayed the same  
But you should know that I'm not placing blame  
You'll change (You'll change)  
Your anger burns out heavy  
And I know it's hard to tame

Look at you and see an old me  
Maybe you're on your own journey  
Haven't found the space to understand  
But we've got to  
Wade our way, reasons unspoken  
We couldn't have even known then  
Maybe I just thought  
Of telling you before I forgot

I've changed  
I see you've stayed the same  
But you should know that I'm not placing blame  
You'll change  
Your anger burns out heavy  
And I know it's hard to tame

I've changed (I've changed)  
I see you've stayed the same  
But you should know that I'm not placing blame  
You'll change (You'll change)  
Your anger burns out heavy  
And I know it's hard to tame

Tame  
Tame

Oh
