

The Moment

Cafuné

I wanna see you open up just like a faucet
Pour out every worry to me
You know how they say that
Growth is never warm and comfy?

I long for something true
This life's mistakes made next to you
I never really knew if I did enough to show
There don't have to be a reason
That I'm still here and here for you

Till the lights go out
You'll find me where you need me
Let me hold you down
And take this funny feeling
Till the lights go out
I'm glad to fill my pages up
About you, about you

We shared another moment, and
Then that moment died right beneath our noses
Though I tried to keep it goin'
But it can never last, no longer than a moment
I just try to keep it going, my life inevitably flowing

Till the lights go out
You'll find me where you need me
Let me hold you down and take this funny feeling
Till the lights go out
I'm glad to fill my pages up
About you, about you
