

# Beyond the Apocalypse

Cage

It's over, the end times have now come and gone  
Smoldering cities still burning in the distance - the breaking of dawn  
Crawling from wreckage, survivors uniting - we rise with glory and steel  
Inside us we're changing, evolving and knowing - a new golden age is here

The fighting is over, the battle is won, the holy war left us in ruin  
up  
From the ashes our new world's begun - a spiritual revolution

We hear the devil say then we turned around and walked the other way  
He whispers to your soul  
Broken bones, blood on ice, I'm your human sacrifice  
Lose your mind, no control, we just want to rock and roll

The lords of the dark are gone forever and all  
We stand in victory

Rise up and be counted for those that come tonight  
Thy kingdom come, thy will be done alright  
We're taking you far beyond the apocalypse (far beyond)  
Taking you far beyond the end of the world (far beyond)  
We're taking you far beyond the apocalypse (far beyond)  
Taking you far beyond the end of the world

Spiraling upwards and touching the sky, new cities of shimmering silver  
Into the future our power will fly, creation has been changed forever

We hear the devil say then we turned around and walked the other way  
He whispers to your soul  
Broken bones, blood on ice, I'm your human sacrifice  
Lose your mind, no control, we just want to rock and roll

Utopian nights, cities with luminous lights  
Turning the darkness into eternal daylight

What is happening to me?  
I feel strange

Rise up and be counted for those that come tonight  
Thy kingdom come, thy will be done alright  
We're taking you far beyond the apocalypse (far beyond)  
Taking you far beyond the end of the world (far beyond)  
We're taking you far beyond the apocalypse (far beyond)  
Taking you far beyond the end of the world

Where do we go from here now (the end of the world)  
That there is nothing more to fear (the end of the world)  
Where do we go from here now (the end of the world)

That there is nothing more to fear (the end of the world)
