

# Die Glocke

Cage

A secret of the darkest kind  
A legion of 62 scientific minds  
The black sun did command  
Make a weapon that no man  
Or army could withstand  
Gerlach would lead them all  
A burden that he bore  
Succeed and win the war  
Build a force that's irresistible  
the source of their demise  
proportions so combustible  
Our victims vaporized  
Violence so unstoppable  
We're born to terrorize  
Fight fight for your life fight to the death die glocke  
Fight stand up and fight fight to death die glocke  
They constructed the device  
In a polish mine deep as hell  
Tortured steel with the shape of a massive bell  
From the north tower to the nest  
Take seven of your best and proceed with the first test  
The chamber fired a flash then quantum theory crashed  
The men were turned to ash  
They turned on the machine  
And they heard the engine whine  
Black technology xerum 525  
Magnetic alchemy that no life form can survive  
Astonished by this wonder weapon  
Twisting space and time

The called the mine the beehive for the wicked sound it made  
Near the polish border it was buried like a grave

All was lost for the Reich it was axis denied  
General Sporrenberg had a cure to prescribe  
For silence to remain  
And the Reich to live again all 62 were slain  
No one was left to talk  
They flooded all the rock  
And saved us from die glocke  
How did the bell just disappear  
And vanish with no trace  
Some say it's in the amazon a secret Nazi base  
Or buried in Antarctica amongst the frozen waste  
Or did it fall in Kecksburg from Andromedan space
