

Contact High

Caitlyn Smith

I gotta tell you
If you come any closer
You're gonna have to take my keys away
I'm getting dizzy, babe
The room is spinning
Like a tilt-a-whirl
And I swear that I haven't drank a drop
But this buzz won't stop

I haven't even touched your skin
What's gonna happen if I lean in?
Haven't even had your kiss
And I'm already feeling like this

You give me that contact high when I look in your eyes
I don't need pills or wine when I'm close to you
I was just in the room
Everything you do, send me to the moon
Happens every time, you send me to the sky
And I'm messed up on your life, baby
Contact high
(Contact high)

There's no denying
That I'm sliding, slipping, losing my grip
'Cause it's easy to with just me and you, baby
So let's stop trying
To hold back the flow of that dance
Gotta go for it, you gotta know
And I'm like whoa

You give me that contact high when I look in your eyes
I don't need pills or wine when I'm close to you
I was just in the room
Everything you do, send me to the moon
Happens every time, you send me to the sky
And I'm messed up on your life, baby
Contact high
(Contact high)

Watch me if you come a little closer
I dare you to come a little closer
I love it when you come a little closer, closer, closer
Watch me if you come a little closer
I dare you to come a little closer
I love it when you come a little closer, closer

Gimme that contact high when I look in your eyes
I don't need pills or wine when I'm close to you
I was just in the room
Everything you do, send me to the moon
Happens every time, you send me to the sky
And I'm messed up on your life, baby
You can cut this tension with a knife
Contact high
(Contact high)

Oh, yeah
Watch me if you come a little closer
I dare you to come a little closer
I love it when you come a little closer, closer, closer
Watch me if you come a little closer
I dare you to come a little closer
I love it when you come a little closer, closer, closer
Oh, baby, I dare you
Oh, baby, I love it
Oh, baby, oh, baby
Ooh
