

# Fever

Caitlyn Smith

I've got a high fever  
Yeah, I'm a stone cold breather  
And the mercury keeps rising  
From the heat inside your eyes and  
I need a strong pain reliever

Can't sleep through the night  
Shivers up my spine  
Burnin' up my mind

'Cause I don't, don't want to want you, no  
Don't want to need you so I just walk away  
Every time that I get too close  
I trip and I overdose and then it's too late  
And I've got a fever, fever  
I've got a fever, fever  
I've got a fever, fever  
I've got a oh, yeah

Like a strong, strong whiskey  
Like gasoline on a fire  
And the minute that it hits me, I feel a little dizzy  
Little green, a little wild

I don't, don't want to want you, no  
Don't want to need you so I just walk away  
Every time that I get too close  
I trip and I overdose and then it's too late  
And I've got a fever, fever  
I've got a fever, fever  
I've got a fever, fever  
I've got a high, yeah

I don't, don't want to want you, no  
Don't want to need you so I just walk away  
Every time that I get too close  
I trip and I overdose and then it's too late  
Yeah, yeah

I don't, don't want to want you, no  
Don't want to need you so I just walk away  
Every time that I get too close  
I trip and I overdose and then it's too late  
And I've got a fever, fever  
I've got a fever, fever  
I've got a fever, fever  
I've got a high, yeah
