

# Lonely Together

Caitlyn Smith

The last ten months I haven't slowed down  
It's been wheels up, wheels down  
Trying to gain a little ground  
Most nights I lay down my head  
And I'm grateful but I miss my friends  
Been a little bit sad so I called up a doctor  
Didn't want his pills just someone to talk to  
Still he wrote me a script  
But it ain't gonna fix the human condition

Doesn't everyone cry  
Cry at the stars?  
Doesn't everyone try way too goddamn hard?

You got a heart like mine  
I can name every color  
You make me feel like I'm  
Not going insane  
And when you're by my side  
Oh, I get a little bit better  
Hold me, let's be lonely together  
Hold me, let's be lonely together

Kiss my face when I'm staring off into space  
Know what I'm thinking and I don't gotta say it  
You just pull the curtains and turn down the lights  
Put out the fire in my mind

Doesn't everyone want to just be understood?  
To look into another's eyes and be recognized

'Cause you got a heart like mine  
I can name every color  
You make me feel like I'm  
Not going insane  
And when you're by my side  
Oh, I get a little better  
Hold me, let's be lonely together  
Hold me, let's be lonely together

You got a heart like mine  
I can name every color  
You make me feel like I'm  
Not going insane  
And when you're by my side  
Oh, I get a little better  
Hold me, let's be lonely together  
Hold me, let's be lonely together
