

## She Told Me So

Cal Smith

The world is square I know it is she told me so  
And anything she says is right I know  
Though jealous tongues have tried to say that she's untrue  
I know she isn't cause she told me so

Last night she went out dancing with my best friend  
And they went to a night spot for a show  
But jealous tongues have said they saw him hold her tight  
I know he didn't cause she told me so

She always comes to me and tells me everything  
She knows how jealous tongues bring things around  
Like the night they said they saw me come home late  
They couldn't have cause we were out of town

So let them go on say they see what they know  
She loves me and that's all I need to know  
But jealous tongues have tried to tell me she's untrue  
I know she isn't cause she told me so
