

# Bring Us Hell

Calabrese

We are the resistance from the future persistence  
As they roll doomsday machine.  
We don't need a master, cybernetic disaster,  
I won't kneel to lesser men.

Well, I know my time is gone.  
Life around me as evolved  
Into the ground, into the waste,  
So I'll take all I can take,  
Pulling you all down to the grave,  
Bring us hell, bring us the hate.

And I feel the power of the beating sounds of  
A grey and dreamless world,  
And the fires below, yeah,  
They wanna show me all our burnt and evil fate.

Well, I know my time is gone.  
Life around me as evolved  
Into the ground, into the waste,  
So I'll take all I can take,  
Pulling you all down to the grave,  
Bring us hell, bring us the hate.

Frozen like a prisoner born of black ice,  
Waiting for to sound the drums of war.  
Think layer of human flesh stretched over living machine,  
Don't pretend to be so clean.

Warheads strike with no warning,  
Anti-gravity revenge,  
Extermination human race,  
Full spectrum dominance.

Well, I know my time is gone.  
Life around me as evolved  
Into the ground, into the waste,  
So I'll take all I can take,  
Pulling you all down to the grave,  
Bring us hell, bring us the hate.

Hey, hey!  
Hey, hey!
