

Endless Night

Calabrese

There's a darkness in the world
I feel its pull
In the beating heart that kicks out dirt
You'll find me there
'Cause the only death I like
Is the death buzz of the night
When your knife plants a kiss through my heart,
You're alive

I know I don't belong
I know you wanted more
It's all a lie, you know
Paranoia's cold shadow

In this endless night
You will do just what you're told
Don't look back you're alone

Possessed with a spirit brought forth
Down deep with the vultures and the worms
A quicksand of serpents reminds me
My bones and the dirt are the same
