

Live For Days

Cale Dodds

Sometimes I feel like I just wanna take the long way home
Something inside me says that I should do the things that I want
when I want

Yeah so far so good like walking on the ceiling
I always thought I could and I finally got that feeling
Something inside me says that I should do the things that I want
when I want

I could live for days like, could live for days like this
I could live for days like, could live for days like this

I'm in the kinda mood that I been waiting on for so long
It's like I'm standing in the light and now I'm right where I belong,
so come on, come on

Yeah so far so good like walking on the ceiling
I always thought I could and I finally got that feeling
I'm in the kinda mood that I've been waiting on for so long, for
so long

I could live for days like, could live for days like this
I could live for days like, could live for days like this
And I'm finally here, been a long time coming
Gonna stay a while, it's got all I wanted
And I could live for days like, I could live for days like this

And I could live for days like, I could live for days like this

I could live for days like, could live for days like this
I could live for days like, could live for days like this
