

Outta My System

Cale Dodds

I know I need help
But I don't want any yet
I know that I could
But I don't want to quit
I got all the symptoms
That I'm going through withdrawals
I can resist you
But I still give in when you call, 'cause

I can't get you out of my system
Long enough for me to forget you
'Cause when I try to forget you
I just miss you baby
We break up, get back together
Even though we both know better
You got me addicted
I admit it I think I need a detox
More than just a few days off
I want it but I can't stop
Nobody to blame, it's all my fault that
I can't get you out of my system
Long enough for me to forget you
Gotta get you
Out of my system

Maybe my want you is too strong
Or maybe I'm just weak
Girl I got it bad
For something that's no good for me
My heart and my head know what it is I need to do
But it's too hard to let go
When I'm still holding on to you

I can't get you out of my system
Long enough for me to forget you
'Cause when I try to forget you
I just miss you baby
We break up, get back together
Even though we both know better
You got me addicted
I admit it I think I need a detox
More than just a few days off
I want it but I can't stop
Nobody to blame
It's all my fault that
I can't get you out of my system
Long enough for me to forget you
Gotta get you out of my system

I guess I don't know how to just let it in
Give you up for a while till I give in again

I can't get you out of my system
Long enough for me to forget you
'Cause when I try to forget you
I just miss you baby
We break up, get back together

Even though we both know better
You got me addicted,
I admit it I think I need a detox
More than just a few days off
I want it but I can't stop
Nobody to blame
It's all my fault that
I can't get you out of my system
Long enough for me to forget you
Gotta get you out of my system
