

That's When I Knew

Cale Dodds

I could see it in her eyes
There was something on her mind
She broke the silence saying
Baby, tell me how'd you know
And I said
Do you remember that very first night
'Cross the room
Your eyes met mine
You were dancin' to the rhythm
Of Petty on the Radio

Lightning struck
There was nothing I could do
You were firing me up
With every little move
Time stood still
And the world stopped spinning
Like I just found
Everything I been missing
Just like that
I was holding on
Couldn't hold me back
It was set in stone
Finally found something
I'd fight not to lose
Yeah girl,
That's when I knew

I remember that little black dress
Your shade of red painted on your lips
Every detail of the night in my mind
Is clear as day
Girl,
I didn't even know your name
All I knew is
Everything had changed
Every heartbeat baby
You stole it
In a flash
In that moment

Lightning struck
There was nothing I could do
You were firing me up
With every little move
Time stood still
And the world stopped spinning
Like I just found
Everything I been missing
Just like that
I was holding on
Couldn't hold me back
It was set in stone
Finally found something
I'd fight not to lose
Yeah girl,
That's when I knew

Lightning struck
There was nothing I could do
You were firing me up
With every little move
Time stood still
And the world stopped spinning
Like I just found
Everything I been missing
Just like that
I was holding on
Couldn't hold me back
It was set in stone
Finally found something
I'd fight not to lose
Yeah girl
That's when I knew

(Ohhh woah!)
(Ohhh woah!)
(Ohhh woah!)
Yeah girl,
That's when I knew
(Ohhh woah!)
I was holding on
(Ohhh woah!)
It was set in stone
(Ohhh woah!)
Finally found something
I'd fight not to lose
(Ohhh woah!)
Yeah girl,
That's when I knew
