

Get There When I Get There

Caleb Hearn

What's your five-year plan?
Have you thought ahead?
'Cause 23 is close to 30
And 30's close to getting old

Have you fell in love?
Like all your friends 'cause, honey
I can't help but worry
It'll be too late before you know

I know it worked for you
But just because it worked for you

Why should I be living in the future?
Or living in the past
When the middle's what I'm never getting back
And I don't wanna wonder where I'm going
While missing where I'm at
Just to find out all I want is what I had
Yeah I'm scared
But I don't care
I'll get there when I get there

It's been so long since I woke up
And wasn't drowning in my worries
Getting by and showing up

I wanna try
To take my time
Have a simple conversation
Is that asking for too much?

Could it work for me?
'Cause even if there's a possibility

Why should I be living in the future?
Or living in the past
When the middle's what I'm never getting back
And I don't wanna wonder where I'm going
While missing where I'm at
Just to find out all I want is what I had
Yeah I'm scared
But I don't care

I'll go anywhere I want to
I don't need to see the end
I'll take falling over standing on the edge
So I'll go anywhere I want to

I'll run headfirst in the storm
I'll go places that I've never been before
Yeah I'm scared
But I don't care
I'll get there when I get there

Yeah I'm scared
But I don't care

I'll get there when I get there
