

# Another Space

Calexico

Waiting in the garden, the winner's late  
It's heating up again on the fire escape  
All the dirty money follow the trail  
Falling too deep and no turning back

In another time, in another space  
In another way, we'll get back to this place  
In another time, in another space  
In another way, we'll get back to this place  
In another time, in another space  
In another way, we'll get back to this place  
In another time, in another space  
In another way, we'll get back to this place  
In another time, in another space  
In another way, we'll get back to this....  
Back to this place

Could be scars seen from above  
It's not a window you're jumping out of  
Then the oil spills to the satellites  
Driven to disaster and you're closing your eyes  
Take a look at your watch, take a look at the mask  
Making a clean sweep of the future, present and past

In another time, in another space  
In another way, we'll get back to this place  
In another time, in another space  
In another way, we'll get back to this place  
In another time, in another space  
In another way, we'll get back to this place  
In another time, in another space  
In another way, we'll get back to this....  
Back to this place

In another, in another, in another, in another...  
In another... get back to this...
