

Bite your lying tongue  
I know your right is wrong  
You won't bring us down

Bite your lying tongue  
I know your right is wrong  
You won't bring us down  
The virus will kill us all

An idea arises  
It is so contagious  
It narrows the horizon  
In the darkest hour of reason

It's like being haunted by a ghost  
Why can't, why can't I say no?!

They wanna make us believe  
In everything that they preach  
Manipulate our trust  
To feed the virus in us  
And everything that we see  
Humanity's tragedy  
The darkness deep in our hearts  
Became the virus in us

It's going viral  
Thinkuisition  
Can't you see the brave new world  
One God, one vision  
All these lies are cutting deep  
Bending reality  
Freedom is slavery  
So it shall be

It's like being haunted by a ghost  
Why can't, why can't I say no?!

They wanna make us believe  
In everything that they preach  
Manipulate our trust  
To feed the virus in us  
And everything that we see  
Humanity's tragedy  
The darkness deep in our hearts

Break me  
Break free, break  
Break everything

Break me  
Break free, break  
Break everything

Break me  
Break free, break  
Break everything

Break me  
Break free, break  
Break everything

Cause everything is falling apart

Implanting a thought from mind to mind  
Painting everything in black and white  
Creating the lie  
Creating the lie - LIE!

They wanna make us believe  
In everything that they preach  
Manipulate our trust

They wanna make us believe  
In everything that they preach  
Manipulate our trust  
To feed the virus in us  
And everything that we see  
Humanity's tragedy  
The darkness deep in our hearts  
Became the virus in us
