Call Me Loop

Here you come creeping
Up on my private page
Get all your people
To mimic what you say
Cos it's just a game of pride now
Your ego is getting bruised
But it's not secret
I'll come out better than you

Remember you were faded and nobody knew your name
Before I came along and put you back in the game

I made you look good
Better than you ever should
Now you wanna drag me down
Don't you know you're nothing without me around
I made you feel big
Through a higher education
Oh, please do me a favour
You're just cool by association

I know you see me
You're hanging off every word I say
You want a piece but
I ain't giving anything away
Cos this is just waste of time now
Can't you see you're going to lose
Yeah, it's no secret
I do this better than you

Remember you were faded and nobody knew your name
Before I came along and put you back in the game

I made you look good
Better than you ever should
Now you wanna drag me down
Don't you know you're nothing without me around
I made you feel big
Through a higher education
Oh, please do me a favour
You're just cool by association

You're just cool by association

Remember you were faded and nobody knew your name
Before I came along and put you back in the game
Is it your intention to be driving me insane
Cos I just wanna punch you in the face

I made you look good
Better than you ever should
Now you wanna drag me down
Don't you know you're nothing without me around
I made you feel big
Through a higher education
Oh, please do me a favour
You're just cool by association

You're just cool by association
You're just cool by association
