

Soapbox

Call Me No One

Here we are again - the time has come
To crash and burn - I swear we will not ever learn
Look out now
- here comes the saint and all the condescending faces
- makes you feel complacent all day long -

Here's to the miracles
You came along way down
Here's to your soapbox show - I swear
Spectacle - so show us where to go now
Maybe you don't but we know

So here's the one we love - so glorified
I'm sure you know - don't keep us waiting - please no more
The never ending - endless fight - the cutting into me
- that drives me crazy
That makes you feel amazing - but now I'm gone

Take this with you - come down now
Nothing gets through to you now
See through the real you - come down
