

Pick Your Battles

Calla

You got me runnin' around
Draggin' me through the ground
Without so much a warning
Desperate divided and discreet

Got nothin' to hide
An immanent threat in your mind
To fight is to deny it
Desperate times
For all your desperate needs

Your world crashes down
How sweet the sound
Try and fight it
Pick your Battles
Take it out on me

This time I'm standing my ground
They're closing in all around
When every second counts
Pick your battles
Push your luck and see

Got nothin' but time
A minimal hint of a sign
Directed and deflected
Pick your battles
Push your luck and see

On a roll
To find yourself

Your World crashes down
How sweet the sound
You can try and fight it
Pick your Battles
Take it out on me

A Massive cover-up
Hypocritical in more ways than one
Your best intentions are
Are what we're fighting for

A Massive cover-up
Hypocritical in more ways than one
Your best intentions are
Are what we're fighting for

La Nina
La Mira
Querida
El Fuego
La Vida
La Santa Maria

A Massive cover-up

Hypocritical in more ways than one
Your best intentions are
Are what we're fighting for
