Dark Clouds

Calling All Captains

I've been trying my best to find some peace of mind
I think I've had enough, my blood has turned to rust
Holding it in like how I'm used to
If I keep it up, yeah, that's a heart attack I'm going through

I want the world to know something about me
I'm falling into a void where there's no sound
No pressure to live with
I get inside my head thinking nobody would miss this
Yeah, I wanna pass out
'Cause my head's in dark clouds
Don't think I'm a burnout
I'm just straight burnt out
Might die from the fallout

Sing it to me one time, one time
Then I'll write another line in due time
You will see what I see in my eyes
Fire that is burning the soul inside

So tell me, what's it feel like to think that you can never do wrong
I'll be falling into pieces tryna' finish a song
But still I'm pushing through with people singing along
Now I'm thinking, drop the clutch, I pin the throttle, I'm gone

I want the world to know something about me
I'm falling into a void where there's no sound
No pressure to live with
I get inside my head thinking nobody would miss this
Yeah, I wanna pass out
'Cause my head's in dark clouds
Don't think I'm a burnout
I'm just straight burnt out
Might die from the fallout

Were you there for the fallout?
Were you there to see just how much I lost?
That's shit I don't think about
So please don't bring it up now
I'm dying in the dark clouds

I want the world to know something about me
I'm falling into a void where there's no sound
No pressure to live with
I get inside my head thinking nobody would miss this
No, I wanna pass out
'Cause my head's in dark clouds
Don't think I'm a burnout
I'm just straight burnt out
Might die from the fallout

Tell me what's the thought that should be going through my head
Have you seen how many people who'll be waiting in the end?
Been to way too many funerals and saw my brother cry
I swear all this shit eats me up, and that's why I'm afraid to die
