

Every River

Callista Clark

I wanna know you
Like you know yourself
Hear every chapter
That there is to tell

All the rain and the water
The canyons that they've carved
In your heart
That made you who you are

All the good
All the bad
Stories written over time
Every twist
And every turn
Round the forests of your life
I wanna chase down every memory that was worth you memorizing
Run with every river in your mind
I wanna run with every river in your mind

Just wanna get lost in your eyes
And follow where they lead
Through the mountains and the meadows
'Til it empties at the sea

All the good
All the bad
Stories written over time
Every twist
And every turn
Round the forests of your life
I wanna chase down every memory that was worth you memorizing
Run with every river in your mind
I wanna run with every river in your mind

If I could watch your life like a movie
And learn all the things you know
Catch up on all the things I've never seen
Found out what's down the road

All the good
All the bad
Stories written over time
Every twist
And every turn
Round the forests of your life
I wanna chase down every memory that was worth you memorizing
Run with every river in your mind
I wanna run with every river in your mind
