

# Give Me Something

Calum Scott

I called your number about a hundred times  
And I know, that you know that it's me  
I sat and listened for hours and hours  
When the world got you down on your knees

All that I wanna do is to hold you tight  
Love you until you're back on your feet  
But it's hard when I'm laying my heart in your hands  
And you don't hand yours back to me

Just give me something  
I don't need to know but you're giving nothing  
I'll take anything at all  
Just give me something  
Cause all that I need is you  
And you're giving nothing  
Just give me something

I left you flowers outside your door  
I see them die and it's killing me  
Feel like a man on a walking wire  
Cause every change you get you're pushing me

You can break every bone, I'm still standing here  
Wait until you can finally see  
You know all that we had it was magic  
Now tragically I'm begging you please

Just give me something  
I don't need to know but you're giving nothing  
I'll take anything at all  
Just give me something  
Cause all that I need is you  
And you're giving nothing  
Just give me something  
Just give me something  
Oh, just give me something  
Oh, just give me something

I don't know how many nights  
I can sit here waiting for you to come home

Just give me something  
I don't need to know but you're giving nothing  
I'll take anything at all  
Just give me something  
Cause all that I need is you  
And you're giving nothing  
Just give me something  
And I don't need to know but you're giving nothing  
I'll take anything at all  
Just give me something  
Cause all that I need is you  
And you're giving nothing  
Just give me something
