

# Slow Down

Calvin Harris

Oh, oh

Everybody slow down  
Everybody, everybody slow down  
Everybody be on the low down  
And it's cool if you wanna be slow now, no doubt  
Remember that night at your old house?  
Remember that time that you broke down?  
Saying that you're happy, that you dropped that chain  
No I'm not, I'm the one to hold down

Champagne, I took all your clothes off  
Champagne, 'cuz you called other girls off  
And I'm make it make it pop like soda  
And you're make make me take my clothes off  
I'm still a kid and, I'm stealing your time  
But I still feel your heart, so I'm asking

Could you just be real?  
Don't be scared to feel this  
We can make the world go still  
Could you let me feel this?  
You can risk it, but I'll be here  
I can make your lonely disappear right  
I could, could you just be real?  
Could you just be real?

Ain't nobody home now  
Ain't nobody, ain't nobody home now  
Everybody be on that night life flow  
When I exit the club, so they putting on a show now, no doubt  
I ain't tryna move like a dummy  
I'm tryna move real so you trust me  
I'm tryna show you that other people try  
But it's better when you touch me

Champagne, I took all your clothes off  
Champagne, and I'm missing all my phone calls  
Swimming in your bed like be like  
Fucking you a slow jam, I'm rocking your phone now  
I'm still a kid and, I'm stealing your time  
But I still feel your heart, so I'm asking

Could you just be real?  
Don't be scared to feel this  
We can make the world go still  
Could you let me feel this?  
You can risk it, but I'll be here  
I can make your lonely disappear right  
I could, could you just be real?  
Could you just be real?

Could you just be real?  
Real, real, real  
Could you just be real?  
Could you just be, could you just be
