

# Where It All Comes From

Cam Meekins

I don't know where it all comes from  
You got me stuck yeah you got me stuck  
You got a lot of attitude that I love  
You got a lot for me just give me some  
[x2]

Watch the sun come up I'm on my window sill  
Thinking damn life's great like a hundred dollar bill  
That you finding on the street  
I walked into the street with the shoes laced tight and  
My ear I hear this beat and  
I'm thinking about the shit that I got into last night  
Gotta put it all back together got to make things right  
Cause girl I love you there ain't really nothing else above you  
Come through and we can make it high just like the sun dew  
I couldn't believe that she wasn't feeling me before  
Now that I've been on tour she been ready to start a war  
Ever second that I'm spending with her I'm hoping will never end  
She introduced me to her friends and they all a perfect, 10  
So with the homies man we have a good time  
It's the summer and you know that I had to put it in a rhyme yeah  
I'm with the homies and we having a good time man its the summer  
Everything is fine

I don't know where it all comes from  
You got me stuck yeah you got me stuck  
You got a lot of attitude that I love  
You got a lot for me just give me some  
[x2]

My second verse is like our love it gets better with time  
I'm wondering if you will be mine, umm  
I'll make it simply we can go and see a movie  
If you into rolling doobies then you should roll with yours, truly  
Cause last summer we were just a fling  
Now I'm wondering if we can be the real thing yeah  
Nobody else is going to make that shit happen  
Remember when I put that number on that napkin yeah  
Know its real you really know its real  
So come and chill girl tell me what's the deal  
I got a lot of people that depend on me  
So come and kick it in my bed room and just bend on me

I don't know where it all comes from  
You got me stuck yeah you got me stuck  
You got a lot of attitude that I love  
You got a lot for me just give me some  
[x2]
