

Not Over Yet

CamelPhat

It's not over yet
It's not over yet
It's not over yet

Can you see the ancient lights of home are there when you're alone?

Let them carry you back when you're miles away
Back to a dream tired and the sun, it belongs to everyone
Let the bells ring out for another day

Leave the kids alone
'Cause the future's caught in the crosshair
Of a mad man on the roam
If we find our way through the city lights
There's a place for us out there somewhere
Let the dream take flight

It's not over yet
It's not over yet
It's not over yet
It's not over yet
It's not over yet

For love, we've try to find the cure, but we need it more and more
And the world won't wait for another day
For you, you're running round my head
Be the angel in my bed forever more

Leave the kids alone
'Cause the future's caught in the crosshair
Of a mad man on the roam
If we find our way through the city lights
There's a place for us out there somewhere
Let the dream take flight

It's not over yet
It's not over yet
It's not over yet
It's not over yet
It's not over yet
It's not over yet
