

Wildfire

CamelPhat

Fill your lungs with that clean cold air
Can't be as bad as it seems
Take fights for itself and fight for someone else
But don't leave your mother's dreams

Brandish knives and light your pitchforks now
We're feasting on the feeling tonight
We are a wildfire, spreading like oil on water
You better put up a fight

So lay down, lay down, we are a wildfire
Lay down, lay down
Lay down, lay down, we are a wildfire
Lay down, lay down (you better put up a fight)
Lay down, lay down, we are a wildfire
Lay down, lay down
Lay down, lay down, we are a wildfire
Lay down, lay down

Is it any wonder
Is it any wonder why
Is it any wonder
Is it any wonder why

Do you wonder how far you'd go
To find the perfect car to lose
With a million combinations and every element
Would you ever doubt that I exist?

Brandish your knives and light your pitchforks now
We're feasting on the feeling tonight
We are a wildfire, spreading like oil on water
You better put up a fight

So lay down, lay down, we are a wildfire
Lay down, lay down
Lay down, lay down, we are a wildfire
Lay down, lay down (you better put up a fight)
Lay down, lay down, we are a wildfire
Lay down, lay down
Lay down, lay down, we are a wildfire
Lay down, lay down
