

## Friend To me

Cameo

I've peeped through open doors  
Looked here and there and then some more  
Who else can it be  
When you're sure you've tried it all and all

Did you ever know  
That you'd find a friend  
And did you ever dream  
He would be with you thick and thin  
Catch me if I fall  
We've nothing to fear at all  
Oh cause we have made it grow  
And we've learned what there is to know

If you let it be - so unselfishly  
You'll be a friend to me  
When your heart's full of love  
There's a well you're giving of  
It's yours for free  
It has no end

Did you ever know  
That you'd find a friend, find a friend yeah  
And did you ever dream, yeah dream  
He would be with you thick and thin  
Hey catch me if I fall  
Cause we've nothing to fear at all  
Cause we have made it grow, yes we did  
And we've learned what there is to know  
Yeah

If you let it be - unselfishly  
A friend to me  
When your heart's full of love  
There's a well you're giving of  
It's yours for free, yours for free
