

I've Got Your Image

Cameo

I've got your image
In the middle of my mind
And every single time
It makes me very high

Two lovely people
We'll get to know ourselves
So much better than we felt
And better than the rest

Oh, I
We love when we love like we do
But I do, I do, I do
Feel so satisfied

Answers to questions
That we never knew
They finally come through with you

I've got your image
It's like we're walking down the street
And all the people that we greet
Are dressed and very neat

You said I love you
So I asked just how you felt
About kids and wedding bells
And a life that could be shared

I tried
To show you and I hoped I wouldn't goof
But the pudding is the proof
Please give me a try

I know
I love you, guess I'll always will
Until the earth is still
We'll

I'm standing right here to say
That I love you and I'll always stay
Because I love you
Because I love you

I'm standing right here to say
That I love you and I'll always stay
Because I love you
Because I love you

I'm standing right here to say
That I love you and I'll always stay
Because I love you
Because I love you

I'm standing right here to say
That I love you and I'll always stay
Because I love you

Because I love you
