

Your Ghost

Camidoh

I miss everything we did before
Hide and seek in the Gucci store
You being the engineer when I write a song
I wish could hold you in my hand
I wish I could carry your pain
But e no dey possible

I'm talking to your ghost in the morning
Asking about your new world how's it going
And I hope you found somebody to talk to when you're lonely
I'm writing a new song can you hear it
It's winter over here when I'm cold
Would you fetch me your favorite blanket to keep me warm (Oh)

For a second I was dreaming feeling you were still next to me
I would have asked you to help me with a line (Ah-ah-ah)
And I almost texted asking you to come give me your company
You know I don't like being alone when it's late night

If I'm talking to your ghost
Let me know you hear me
Are you there my friend
At least I'm not alone

If I'm talking to your ghost
Let me know you hear me
Are you there my friend
At least I'm not alone

Do you still remember my favorite game
The one we played in the rain
Fetch water in your father's old car tyre
Ride till my mother raise cane

Everybody know say this life e be you and me
We dey like two and three
Many many things wey I see for this life alone
And I wish say you dey with me (Oh)

I'm trying
God please
Help me
It's like they're taking everything from me
(Taking everything from me)

For a second I was dreaming feeling you were still next to me
I would have asked you to help me with a line (Ah-ah-ah)
And I almost texted asking you to come give me your company
You know I don't like being alone when it's late night

If I'm talking to your ghost
Let me know you hear me
Are you there my friend
At least I'm not alone

If I'm talking to your ghost
Let me know you hear me

Are you there my friend
At least I'm not alone

I wish I could hold you in my hand
I wish I could carry your pain
But e no dey possible
