

Running With The Hurricane

Camp Cope

Well, I can't get out of this hole I've found
I've seen the light and it's not going out
She talks me up, I bring myself down
Comparing the best parts of you to the worst in myself
I get so bored thinking about anyone else

And if this is the bottom I can show you around
There's no other way to go, there's no other way to go

Look out boys, I'm on fire and I'm not going out
I've been moving with the bodies that move to a different sound
And that fire started burning
And that hurricane was turning once I moved

And if this is the bottom, I can show you what to do
There's no other way to go, there's no other way to go

The only way out is up, and I'm keeping up
The only way out is up, yeah, I've been keeping up

I'm climbing out, I can feel the air
I feel it like it's always been there
It says "the only way out is up"

I can stretch my legs and run
I'm taking my place, running with the hurricane
Breaking these chains, running with the hurricane
Started painting my face, running with the hurricane
I push through the pain, running with the hurricane
I'm taking my place, taking my place, yeah
