

Midnight Sky

Can

This is just how I feel today
My man, don't you know everything is gonna come out fine?
All right, yeah yeah ?

The daily news
Somebody brought me the daily newspaper
Said everything is good
You know how the news is meant to be
Don't you know everything got to be all right?

Everything got to be, got to be all right
Everything got to be, got to be all right
Everything got to be, got to be all right

Everything got to be, got to be all right
Everything got to be, got to be all right
Everything got to be, got to be all right

Everything got to be, got to be all right
Everything got to be, got to be all right
Everything got to be, got to be all right
Everything got to be, got to be all right

Had to ... ? a cat ? about some midnight sky
Had to come home, I almost died last night

Stage fright ? gets me satisfied
You know I can't take it in the jaw ?
That's still for 1965

Somebody is ringing on the bells at the dorm ? in the corner ?
And won't let me sleep pass the ... ? in the clock

Someone said last night had to be ? all over the way ?
... ? everyday ... ? I've got to, got nothing else to do
Babe, why you ... away?
Why you ... away?

I've got nothing else to say
Baby, but ? another day is got to come around
Got to get back, you know?
Got to leave your town

Take me home

Livin' all right
No money in my pocket
But I'm living all right
No money in my pocket
But I'm living all right
No money in my pocket
But I'm living all right

When you get too high
You know where ? you gonna do
You got your wings on, you don't know what to do

Everything, everything, be all right
Everything, everything, be all right
Everything, everything, be all right
Everything, everything, be all right
Everything, everything, be all right
