

Imminent Catastrophe

Cancer

Living on a knife's edge
For a thousand years we have known
Destruction in a nuclear sense
As time will now cease to flow

Warheads beckoning
Armageddon with behold
As the world dies
People regret their unholy flaunts

Population extermination
Millions to die
As the dust settles over death
Legacy of humanity
Terrible sight catastrophe

Imminent catastrophe

Bodies lie entombed
In a radiation pit
Festerling from open wound
Blood pouring from your soul
Plunged into darkness
You can see there is no light
Satan you have just met
No eternal life...
