

Anathema

Cancerslug

I march through blood and piss with you
Anathema
I don't know what else I could do
Anathema
My heart is cold and grey
But all my life it's been that way
The only thing that saved my life
Was rage
Anathema

Look at the hatred in my eyes
Anathema
The only thing I can't disguise
Anathema
I walk this lonely path
Just know your future's in my grasp
And every second that you last is a gift

From my Anathema

I don't need anything from you
But I'll take everything that you have
There's nothing left for us to do
No mercy for you to ask

My heart is cold and grey
But all my life it's been that way
So stay the f*ck out of my way
Anathema
My name will ring forever
In your coward heart

My words will last long after
Your worthless bodies rot
Anathema
