

Empty Eyes

Cancerslug

Empty eyes stare back at me
None of them understand what I've seen
I am no Shepard, no one will I lead
Go and cower with the other sheep

Death is my only love
We are as one
Death is my only love
There can be no other one

Razor strikes cold on the meat

Only then will you see my true face
I am no savior, just an injured beast
Twice as deadly now my claws are unleashed

Death is my only love
We are as one
Death is my only love
There can be no other one
