

# Murder Me

Cancerslug

If you will murder me  
I will kiss your cheek  
If the bloodloss doesnt make me too weak

You can burn my body over all of my broken dreams

If you will murder me  
Like a prostitute  
There will be nothing more I can ask of you

And you can spread my ashes in the sewer of my memories

If you will murder me  
Then I will murder you  
With my last breath  
Thats just what ill do  
And we can die together in the filth we leave behind

Feel the pulse slip away once again  
Rip my heart from my chest until it stops beating  
Let me die here in pieces again  
I remember too well how to stop breathing
