

I don't see any other reasons to try
Sister Lucifer standing by my side
To come along if you want to die
'Cause we both know we were already all the time
I know you're young and beautiful and think you're free
That part of you I really wish you'd could be
But there's a darkness in you anyone else can see
Go cut it all and let it loose to run the night with me

Just slit your wrist and watch it spill out onto the floor
We'll make love in the blossoms of blood
Sister Lucifer

I know it's getting late and I should not complain

But we did all my drugs and I still don't know your name
I guess you're out there, you're all the f*cking same
So you'll be Sister Lucifer I'll be the king of pain

My blood is old but your body is young
And all your little pain have only just begun
I know you've lost a lot
But I'm still having fun
So shut your mouth and close your eyes
The work is almost done

I'll slice your throat and watch it spill out on to the floor
We'll make love in the blossoms of blood
Sister Lucifer
