

Revolution of Change

Candi Staton

Revolution, love solution
Revolution of change
Revolution, love solution
Revolution of change

We can make it happen, if we only try
If we can just touch one life at a time
Stop living in a bubble, thinking everything is fine
No, I'm not gonna stop until I see a complete turn around
As long as there are children sleeping on the street
Begging for handouts from every stranger they meet

Revolution, love solution
Revolution of change
Revolution, love solution
Revolution of change

Police brutality taking advantage of their authority
Nobody seems to have regard for human life, no no no no no
Guns on the streets, we never know who's packing
You see love is lacking, there's a war going on
It's the truth and I don't care who don't like
You see it's time we change, it's time we rearrange
It's start to think beyond our own materialistic world
We need a love war, I know we can make a change
Mmm, we can do it, oh, yes we can

Revolution, love solution
Revolution of change
Revolution, love solution
Revolution of change
