

## Alone With Fate

Candice Night

I watched the night go on without you  
I never thought it would ever go  
I used to wait, alone with fate  
But now I see I've always known

That the night would go on without you  
It didn't need your help after all  
And like the sun, forever on the run  
Without a love to call its own

And the days go by like dragonflies  
Hanging magic through the air  
And we all followed the music  
Between the truth and a fearless dare

And the days go by like dragonflies  
Hanging magic through the air  
And we all followed the music  
Between the truth and a fearless dare

I watched the night go on without you  
But all the loneliness is now gone  
But still I wait, alone with fate  
My life is once again my own

Yes, still I wait, alone with fate  
My life is once again my own
