

Another Day

Candice Night

Day breaks and the morning calls
Trees are dancing in the summer wind
Songbird sings the hours away
Another moment, another day

And I know this won't last
But memories of times gone past
Will make us smile and make us stay
Another day

Dewdrops in a spider's web
We all shine when the sun lights our face
Our time begins and our time ends
And we touch so many along the way

And I know this won't last
But memories of times gone past
Will make us smile and make us stay
Another day

I can still see you next to me
Just as clear as that summer day
Memories keep you in my heart
Even time can't steal you away

And I know this won't last
But memories of times gone past
Will make us smile and make us stay
Another day
Another day
