

All Down Hill from Here

Candlebox

Spent half of my life in a rock and roll band
Half the time alive, most the time dead
Had one too many whiskeys, two too many times
But you people keep on giving, and I keep doing time

Yes, I've seen so many faces, seen a couple thousand towns
And I made it to the peak babe
but it's all downhill from here now

More than once I lost direction
More than once lost track of time
Like running in these circles gonna change my fucking mind?!
They say the harder they come, the harder they fall
Well I hit it pretty hard babe, still reeling from it all

Yes, I seen some pretty faces, seen one too many clowns
But the circus keeps on running babe
and it's all downhill from here now

Oh, I can see
So clearly now
Yes, the rain has passed and I'm leaving town babe
All downhill here, all downhill from here now
Baby, said it's all downhill from here now

Well I've seen a million faces, seen a couple thousand towns
I made it to the top babe, but it's
All downhill from here now

Oh, I can see so clearly now
Yes the rain has passed and I'm leaving town, babe
All downhill from here, all downhill from here now
Baby, said it's all downhill from here now
