

Elegante

Candlebox

Shots fired and you wanna feel the heat
You're gonna wake the beast
Shots fired ain't make believe
It ain't make believe
Oh you know a lustful heart, it leads
Oh, but a heart deceives
Hotter than inferno you know Dante
Let's keep it elegante

Take, take what we're just gonna take
And say what we don't want to say
And you can't break a heart halfway
Stay with me love, stay with me love
Wide awake

I see you in my dreams
Vivid when I'm sleeping
Envy and evergreen
Give me something to believe in
Ooh I'm over under undecided
Ooh tell me stories and I'll write 'em

Take, take what we're just gonna take
And say what we don't want to say
You can't break a heart halfway
Stay with me love, stay with me love
Wide awake

We play this game
We're simply broken pieces
The chemicals release us
We play this game
We're simply broken pieces
The chemicals release us

Take, take what we're just gonna take
And say what we don't want to say
And you can't break a heart halfway
Stay with me love, stay with me love
Wide awake

Stay with me love, stay with me love
Wide awake
Stay with me love, stay with me love
Wide awake
Stay with me love, stay with me love
Wide awake
Stay with me love, stay with me love
Wide awake
