

The Bridge

Candlebox

Well, she's not the kind of girl
That you forget about
But she walks along the bridge
Is she considering getting out

But, my friend, when the world comes crashing down
Yeah, my friend, well who is gonna catch you now

She says save me, save me
'Cause it's a long way down, long way down
'Cause it's a long way down, long way down, my friend

Well she's locked away inside
Her mind keeps spinning round
'Cause it's a leap of faith from all
All the scars that hold her down

But, my friend, when your candle's burning out
Yeah, my friend, well who's gonna light it now

She says save me, save me
'Cause it's a long way down, long way down
'Cause it's a long way down, long way down, my friend

Oooh, she never had a reason
Never had a second guess
Never been much easier than this
It's never been much easier

She says save me, save me
'Cause it's a long way down, long way down
'Cause it's a long way down, long way down
'Cause it's a long way down, long way down
'Cause it's a long way down, long way down, my friend

A long way down [repeat]
